

Airfreddy's **Guide on Learning To Fly**

**Step-by-Step Guide On the Private
Pilot License From Start To Finish**

Maintaining Your Certificate

Once you have your Private Pilot Certificate it is good for the rest of your life. That is why you want to commit to it. Once you are finished it is yours forever.

Now if you want to fly friends and family around you are required to perform 3 takeoffs and landings every 90 days and you need a flight review every two years.

If you get your certificate and stop flying for 10 years, all you need to do is go back up with an instructor and get a flight review.

I probably have a list of over 100 students alone that started and let something else get in the way. Make sure you are going to do it and commit to it before you even start. Then it will be yours forever!!!!!!!
