Power Off Approaches

[Airplane Flying Handbook Page 8-23](#)

POWER OFF APPROACHES: I have discussed the power off approach in detail in the traffic pattern document that you can download. The main thing to remember is, you want to watch the numbers at the end of the runway. Fly the pattern the way you normally would except you want to stay a little closer to the runway. Keep your focus on the numbers at the end of the runway. If they go away from the plane, you are getting lower so you will want to correct your flight path and turn in toward the runway. If the numbers start going under the plane, you are getting high. Make your corrections accordingly.

If you do this and adjust accordingly you will be able to hit your spot every time.
